## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 7-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 7, line 2 "position" is confusing and unclear; in lines 5-6 "along a direction in which an opening in the vehicle is open" is vague and confusing; in line 12 "the seat portion" has no definite antecedent basis; in line 13 "is performed around" is confusing and unclear; and in line 16 "makes a direction" is confusing and unclear.

In claim 9, line 10 "in that" is confusing.

In claim 12, line 10 "almost inverted" is vague and confusing; and in line 13 "so as to be positioned toward the exterior of the vehicle" is confusing and unclear since the seat portion is already recited as projecting out of the vehicle.

Claims 8 and 10-11 are indefinite in that they depend from an indefinite base claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 3636

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Claim 7, so far as definite, is rejected under 35 U.S.C. 102(e) as being anticipated by Takenoshita et al.

The mount is 56, the base is 54, the swing arm is 55b, the driving shaft is 57, the connection shaft is 56a and the posture holding portion is 55a.

### ***Allowable Subject Matter***

Claim 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Claims 9-12 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to teach a swinging apparatus including, inter alia, a posture holding portion comprising a fixed sprocket, a movable sprocket and an annular belt, as specifically claimed. The prior art also fails to teach a swinging apparatus including, inter alia, a link mechanism interposed between the rotatively moving portion and the swinging portion, as specifically claimed.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Iwatani et al, Hirasawa et al, Czech et al, Gerstein et al and Lathers all teach devices similar to that of the instant invention.
